

They're easy-going and make great suggestions. I know that they're always working towards our success.
~Roy Scharrer, Owner

DIRTEEZE

product launch of antibacterial wipes

project

Since their introduction in the US in 2016, Dirteeze Rough & Smooth have been growing in recognition as the best trade wipe available. By early 2020, the Dirteeze-US team was already working on an antibacterial version of their popular industrial wipe.

story

The father-son duo of Roy and Sam Scharrer oversees all US Dirteeze product lines, including their flagship Rough & Smooth wipes. "With the accreditation already in the works, we pushed our production partners. Our team stepped up to the challenge!"

The Scan Group helped with marketing tools, including product photography, design, copy editing, and printing. "It's so easy and convenient to work with everyone at The Scan Group", states Roy Scharrer. "They're easy-going and make great suggestions. I know that they're always working towards our success."

DIRTEEZE

product launch of antibacterial wipes

results

Roy and Sam promote their product line through networking, advertising, and sales connections throughout the consumer and industrial supply industry. Since its launch in the US, sales for the Dirteeze Rough & Smooth Antibacterial wipes have skyrocketed. With their growing product line of superior wipes, we're looking forward to continued growth for DirteezeUS.

DIRTEEZE

WIPES WITH A DIFFERENCE

**TOUGH
ABSORBENT
UNIQUE**

**ROUGH & SMOOTH
ANTIBACTERIAL/
SANITIZING WIPES**

Dirteeze-US announces
our newest version of the
Rough & Smooth Heavy Duty
Wipes that are FDA-certified
for Antibacterial Sanitizing!

Now you can have the
"Best in Class" wipes with
FDA certified* antibacterial
and sanitizing properties
needed in today's markets.

*FDA NDC #90119-001-80

ROUGH & SMOOTH

These newly formulated wipes with antibacterial/sanitizing properties can be used on your hands, tools, and other dirty surfaces. Dirteeze unique micro-beads agitate the surface to be cleaned. They are tougher on dirt and grease while staying softer and kinder to hands.

Dirteeze Rough & Smooth Heavy-Duty Wipes are made from spunlace, a unique non-polypropylene material, delivering better absorbency, a much softer feel, and outstanding strength. They are a biodegradable and absorbent alternative to the more common products found in the USA (polypropylene). Spunlace wipes offer significantly better absorbency, strength, and cleaning power.

Removes all sorts of grime:

- Oils, greases, dirt, and grime
- Wet latex paint, oil paints, and inks
- Caulking and expanding foam
- Semi-cured silicone sealants and adhesives

DIRTEEZE

WIPES WITH A DIFFERENCE

TOUGH · ABSORBENT · UNIQUE

CONVENIENT FOR EVERYONE THAT GETS THEIR HANDS DIRTY:
